

ENVIRONMENTAL POLICY

ISO 14001 certified since 2013, APEM SAS is engaged in an environmental policy founded on the principles of sustainable development.

APEM's Management is convinced that environmental performance participates in the improvement of the company's economic performance.

Our commitment relies on 4 main axes:

- Protection of natural environments
 - Control of the impact of our activities on water, ground and air
 - Waste management
 - Prevention of accidental situations
- Preservation of natural resources
 - Limitation of raw material use
 - Control of energy consumption
- Conformity to legal requirements and other requirements we adhere to.
 - Search for components/materials with low environmental impact
- Involvement of all stakeholders and company personnel.

I am committed to promoting this environmental policy, evaluating our environmental performance and – with our Executive Committee – making all decisions necessary to its implementation.

Marc ENJALBERT
Managing Director
