Conformity Declaration: REACH N°1907/2006/CE

We are continuously checking with our suppliers to ensure that we do not include more than 0.1% of any of the candidate substances of very high concern (SVHC) in the products we manufacture or its packaging.

Based on the information from our suppliers all substances in our products are compliant with REACH regulative EC1907/2006.

We do not intentionally add or use any of the chemicals listed as SVHC, which are published by ECHA an initial list of 15 substances on October 28'th of 2008 and since then has been updated with a total of 201 SVHCs, with the most recent addition on July 16, 2019.

We can therefor say that to the best of our knowledge, the products manufactured by MEC ApS in Denmark do not contain any of the substances found on any REACH listing of SVHC.

We will continue to comply with REACH requirements and notify our customers of changes.

Ballerup , 14'th Jan 2020

Dan Larsen
Managing Director
